

# Class 3 February News

We would like to welcome our new classmate, RAMA, to Class 3 😊

In Science, we are learning about how animals change in their environment. We are learning where they live (habitats) and who stays here for the winter and who migrates. We have been very busy creating habitats for different animals.

We are exploring feelings and using our devices to do so. It has been fun looking at pictures of other kids, reading books and talking about feelings. It has also been very messy as we paint our different emotions!

## Reminders

Report Cards go home on February 13. Please sign and return the original report card and IEP as soon as possible. Thank you 😊
