

June

Class 3 June News

Summer is fast approaching and everyone has worked so hard this year! We are looking forward to a fun-filled June to celebrate our accomplishments and to remember all of the good times with friends 😊 We are excited to kick back and have some fun on our end of the year field trip!

It coordinates with literacy development.

Minspeak and literacy are both rule-driven systems. To talk with Minspeak, a person learns a small set of graphics - called icons - and uses them in sequences to say words. In order to read and write, a person learns a small set of graphics - called letters - and uses them in sequences to build words. The process of learning Minspeak coordinates with the process of literacy development. By using Minspeak, a person is building the vocabulary and language needed to develop literacy.

 +  = big
 +  + **er** = bigger
 +  + **est** = biggest

In Science, we are learning about healthy eating and the food groups. We are exploring how vegetables are made and how they get from the grocery store to our homes. Our class has planted tomato seeds and hope to grow them and bring them home to share with our families.

Reminders

Report cards will be sent home on Monday, June 26. Please sign and return all original copies of the report card and IEP promptly. Thank you!
