

## Class 5 News April 2017

**Class 5** is working hard to develop social communication. We are exploring a variety of social words and sentences found on the communication devices. During communication circle we have been encouraging the students to ask their friends a variety of questions to start a conversation. I just love to see the eye contact and connections deepening as the students communicate in this way. As always, all work is differentiated to meet the individual needs and abilities of each child.

**Teacher assessments underway...**

**Discussions with families will take place on interview night (April 25th).**

### Important dates:
